

SORBI

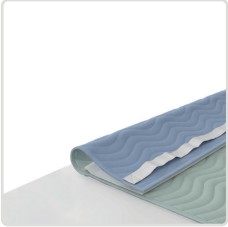

Absorbent pad

Key features & benefits:

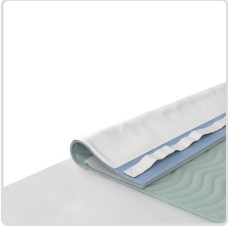

- SORBI is a reusable absorbent pad designed to protect mattresses and other support surfaces in cases of moderate to severe urinary incontinence.
Available in three configurations:
- HL-7200 Regular - standard absorbent pad.
- HL-7200_RANK with handles - with handles for easier placement and repositioning.
- HL-7200_SL Sliding - with handles and a low-friction underside for easier sliding and repositioning.
- High absorption capacity provides reliable moisture protection. Five-layer versions absorb up to 3016 ml/m², while the four-layer version absorbs up to 2628 ml/m².
- The moisture-wicking polyester top layer quickly transfers liquid into the absorbent inner layers, helping the user-facing surface become drier within a short time.
- Absorbent polyester fibre and felt layers retain liquid within the pad, helping protect bedding and the mattress.
- A waterproof and breathable polyurethane membrane prevents liquid penetration while allowing air and water vapour to pass through.
- Fully laminated construction keeps the functional layers securely combined, supporting consistent performance during use and repeated washing.
- Durable polyester upper and lower surfaces support regular professional care, repeated handling and hygienic maintenance.
- Washable at temperatures up to 90°C and reusable up to 200 times, supporting economical long-term use.
- OEKO-TEX® Standard 100 certified materials support use in products intended for close contact with the user.
- Made without fibres known to cause allergic reactions, supporting comfortable use in contact with the skin.
